PROFILE SUMMARY

Motivated and detail-oriented Frontend Developer with a strong foundation in HTML, CSS, JavaScript, and modern libraries like React.js. Proficient in building responsive and user-friendly web interfaces with a focus on performance and accessibility. Adept at using Git for version control and comfortable working in collaborative, Agile environments. Passionate about learning new technologies and eager to contribute to innovative projects while continuously improving skills.

PROJECTS

AI IMAGE GENERATOR

- It is a modern web application that allows users to generate high-quality images from text prompts using powerful AI models. The interface is designed with **ShadCN UI components**, offering responsive, and accessible user experience.

- GitHub: https://github.com/Chiragtyagi18/ai_image_generate

3D Solar System Simulation

- This project is a 3D simulation of the solar system created using Three.js. It allows users to explore the planets, adjust their orbital speeds, toggle between dark and light modes, and pause/resume the animation.
- Live: https://solar-system-mauve-omega.vercel.app/
- GitHub: https://github.com/Chiragtyagi18/solar_system

B2B TenderHub

- TenderHub is a modern B2B tender management platform designed to connect businesses, streamline procurement processes, and facilitate collaboration. It allows companies to create and publish tender opportunities, and other businesses to discover and apply for them.
